JavaScript

OFF

OFF

OFF

OFF

OFF

OFF

```
<ul id="list">
  <li>OFF</li>
  <li>OFF</li>
  <li>OFF</li>
  <li>OFF</li>
  <li>OFF</li>
  <li>OFF</li>
</ul>
```

```
// assign the correct elements to the variable
const listItems = document.querySelectorAll("#list li");

const handleHover = (event) => {
  return event.target.innerText = 'ON';
};

if(listItems.length > 1) {
  listItems.forEach(item => item.addEventListener('mouseover', handleHover));
}
```

Problem 2 :

reset

Click Me

View

```
<input type="text" id="input" readonly/>
<button type="button" id="button">Click Me</button>
```

HTML

```
const button = document.getElementById('button');
const input = document.getElementById('input');

const handleClick = () => {
  input.value = 'Hello World';
};

// type in your code here
button.addEventListener('click', handleClick);
```

Javascript

reset

Hover Me

View

```
<div id="element">
  Hover Me
</div>
```

HTML

```
const element = document.getElementById('element');

const changeText = () => {
  element.innerText = 'Thanks!';
};

// type in your code here
element.addEventListener("mouseover", changeText);
```

Javascript

Problem 3 :

reset

Click Me

View

```
<div id="green"/>
<div id="red"/>
<button type="button" id="button">Click Me</button>
```

HTML

```
const button = document.querySelector('#button');
